THE THEATRES

POLI'S

"Northern Lights" the stirring military drama of Western frontier days, proving one of the most absorbing and interesting offerings given by Poli's. The production is replete with stirring climaxes and startling situations including a realistic battle scene between United States troops and blood-thirsty Indians. The company is at its best in this play. Miss Fleming who is playing her final production in season is winning much praise in her role of Helen Dare. Mr. Ince has the role of John Swiftland, an educated Indian, and has given no stronger performance this season. The supporting company has created an amount of enthusiastic comment.

At yesterday's matinee, the 25 piece silver set offered by Mr. Poli was won by Mrs. Landman, of 202 Norman St. Mrs. Landman held coupon No. 64.

Coupons are being issued this week to ladies for a beautiful foulard dress given to be awarded to the holder of the winning coupon at the matinee next Monday. The gown is now in exhibition in the display window of Meigs & Co.'s store.

In consideration of the fact that this is Miss Fleming's last week at Poli's, souvenir photos of the popular actress will be given lady patrons at the matinee next Thursday. A special farewell reception in Miss Fleming's honor will be held on the stage next Saturday afternoon, at which time she will give a souvenir to each lady attending.

SOCIAL AND PERSONAL

Miss Anna G. Bennett of Fairfield is taking a vacation. She intends to spend several days with her brother in Hartford and her sister, Mrs. Harry T. Day, of Springfield, Mass.

Miss Lucy Pixley, daughter of Mr. and Mrs. Wm. H. Pixley, of Fairfield, was entertained her friends on the occasion of her 18th birthday, yesterday.

The Sunday school of the German reformed church will picnic at Beardsley Park, Wednesday. The teachers and children will assemble in the classroom at 8:30 a. m. The start will be made at 9 o'clock.

The Bethany Bible Class Meeting of North Main street will also picnic at Beardsley Park tomorrow. The table committee has provided a fine dinner.

Miss Ida Shafer of the D. M. Reed company is visiting relatives at Rocky Hill, Conn. She is the stenographer of the ordering department, and is enjoying leave of absence for two months.

SENATOR NELSON OPPOSES MCCLARY

(Special from United Press.)
Washington, July 20.—The opposition Senator Nelson will probably prevent former Assistant Postmaster General James C. McClary from being made director of the mint. The plan was almost promised McClary and the only thing that stood in the way was Senator Nelson's endorsement. This is understood, McClary cannot get the endorsement of Nelson without the endorsement of failure to control his own political district.

SENATOR CULLOM'S WIFE IS MUCH BETTER TODAY.

(Special from United Press.)
Atlantic City, N. J., July 20.—Mrs. Melby Moore Cullom, wife of Senator Cullom of Illinois, who has been critically ill here, is reported much better today and hopes are now entertained for her ultimate recovery.

A bed bug crawling on your children's clothes when away from home does not speak well of that home, but instead gives to your friends a lasting impression of neglect and carelessness in that home and is often whispered around among other friends of the family. Such unpleasant comment could have been avoided if you had used Cyrus Presto Killer for Bedbugs. The cost is only 25 cents and would have effectually cleaned the bed.

KING MANUEL TO WED DAUGHTER OF DUKE OF FIFE

Marriage Expected to Result in Closer Alliance Between Portugal and England, as the Bride to be is the Granddaughter of King Edward.

(Special from United Press.)
Lisbon, July 20.—The official government organ El Liberal to-day announced the engagement of King Manuel and Princess Alexandra, eldest daughter of the Duke of Fife, King Manuel of Portugal, the boy king, who succeeded to the throne following the assassination of his father and brother by revolutionists two years ago, is twenty years old. His fiancée, the English Princess, is the granddaughter of the two years of his reign, has been troubled exceedingly to keep the Portuguese nation quiet. The tragic ending of his father's reign and the peculiar circumstances under which he came into power had left the Portuguese in a state of turmoil. The King has been unable up to this time to get together a permanent cabinet and the foreign relations of Portugal have been neglected.

With this condition of affairs to face, the Portuguese statesmen have urged the young king to make a strong alliance with the daughter of one of the more powerful European royal houses. Overtures looking toward a union with the Princess Alexandra, have been in progress repeatedly, but to-day's announcement is the first definite information made public.

Princess Alexandra, Albert Edwina Louise is the eldest daughter of the Duke of Fife and the Princess Louise, second daughter of King Edward of England. She is an attractive woman. It is confidently expected that the wedding will result in a closer alliance between Portugal and England and the establishment of a firm administration in Portugal.

Pugnacious "Bell Hop"

Fined for Bad Manners Man of Many Bank Books Forfeits a \$10 Bond—Other Business of the City Court.

Andrew Gallagher, who was arrested yesterday for drunkenness, and who when searched, showed bank books with savings recorded amounting to about \$1,350, was released last night on a bond of \$10. He went to his home in the city and called to show up in court this morning. His bond was called.

Peter Bulkley, who at one time was "kicked back" and "going down" at the Atlantic hotel, and who left there because he was not promoted to the "bench," was before the city court on the charge of committing a breach of the peace and assaulting James Restano, a bootblack at the Atlantic hotel. Officer Finnegan testified that Bulkley was very impudent when he made the assault on Bulkley was employed until yesterday at the Stratfield where his ambition to be on the "bench" was satisfied.

Three charges have been brought to the city for the work. On one of the charges Bulkley was fined \$10. Another is the big shovel used in making the trench, and on the lower deck of the third are the office, dining room and kitchen, while the fourth is used as sleeping quarters for the twelve men who comprise the working force.

The main wall lies ten feet below the bottom of the channel, which is twelve feet deep at low water. A trench 25 feet wide has been dredged twice. Because the trench was necessary not only to make the trench of unusual width but also to dig it a second time. Even now the trench is not deep enough to lay the pipe from the west bank at a point directly behind the southeast corner of the railroad station and continues under water for 555 feet to the foot of the Nichols street.

FATAL MISTAKE OF BOYS

HEAD FOR A WOODCHUCK

(Special from United Press.)
Hampton, Conn., July 20.—Ralph Whitaker, aged 16, son of Frank Whitaker of Cincinnati, O., is dead here today, and George Huling, aged 17, is in the custody of the sheriff as the result of a shooting accident last evening.

The boys were hunting woodchucks and Whitaker was hiding behind a large stone with only the top of his head projecting. In the twilight Huling mistook it for a woodchuck and fired, the bullet passing through Whitaker's head, causing instant death. An inquest will be held this afternoon.

Weather Indications.

(Special from United Press.)
New Haven, July 20.—Forecast: fair tonight and Wednesday.

The area of high pressure over the North Atlantic has moved but very little during the past 24 hours. It is producing cool pleasant weather in all sections east of the Mississippi river. A slight disturbance central over North Dakota is producing cloudy weather with slowly rising temperature in the northwest.

Conditions favor for this vicinity fair weather and not much change in temperature.

TRUE BILLS IN SAYLOR MURDER CASE EXPECTED

(Special from United Press.)
Watseka, Ill., July 20.—A special grand jury convened to-day to hear evidence in the Saylor murder case. State's Attorney Fairbanks expects true bills will be returned before noon against Dr. William Miller, under arrest on the charge of murdering John B. Saylor, the Crescent City banker, and Mrs. Saylor and John Grayden, her father, now held as accomplices.

While the prosecutor will not divulge names of his witnesses, it is believed only one new witness will be called and he will testify as to the contents of the private papers found in Saylor's valise after the tragedy.

While the jury was convening considerable interest attended a report that a bloody shirt waist belonging to Mrs. Saylor had been found under a carpet in the Saylor home. The prosecution expects to show that Mrs. Saylor sat on her husband's chest while he was dying. Another clue is said to have been discovered in a heavy hand-print on the curtain of the room in the Saylor home where the tragedy occurred. It is also reported that a revolver was found on Grayden which was fired. It is said that if Miller is indicted he will demand a change of venue. If such a demand is granted it is possible the case will be tried in Kankakee.

LAWYER HAS SKIN OF NEW ANIMAL

Zoar Bridge Farmer Had 21 Deer About His Place Last Winter.

Derby, July 20.—Attorney James F. Tomlinson has the skin of an animal that was given to him by a man named LaBorde, living near Kettleton, just above Zoar Bridge, who claims that it is a cross between a deer and a sheep.

LaBorde says that he has had nine of these hybrids foaled by ewes in his flock, and that all of them died. The animals are like those of a deer, while the skin of the body is covered with wool like a sheep. All winter long, he says, deer were running and feeding with his cattle and his sheep, being fed by him the greater part of the year. He claims that the hybrid is a cross between the animals named. Last winter there were as many as 21 deer about his place.

HOW WATER MAINS ARE LAID IN BED OF PEQUONNOK RIVER

Work Done in 22 Feet of Water by Diver Who Employs Sense of Touch to Bolt Pipe Ends Together -- Salt Water Will be Pumped Out of Main and it Will be Flushed With Fresh Water For Several Days.

The "Why?" of the dredging operations now going on in the harbor north of the lower bridge is the laying of a 20 inch water main, which when completed, will connect with a trunk line at the corner of Main street and Fairfield avenue. This trunk line will then be connected with three reservoirs, the Samp Mortar Rock in Fairfield, the Beaver Dam in Stratford, and the Island Brook on the Madison road north of Bridgeport. Should the water of any one of the three reservoirs become contaminated or should the reservoir be put out of commission for any cause, the other two will maintain the normal supply of water for the central part of the city. In case of drought, when the water may be used at the same time. This arrangement will give the city an advantage possessed by no other city of an equal size in the State.

The trunk line has already been placed in Main street, and the connecting line in Fairfield avenue, but the young men at the Atlantic hotel, and who left there because he was not promoted to the "bench," was before the city court on the charge of committing a breach of the peace and assaulting James Restano, a bootblack at the Atlantic hotel. Officer Finnegan testified that Bulkley was very impudent when he made the assault on Bulkley was employed until yesterday at the Stratfield where his ambition to be on the "bench" was satisfied.

Three barges have been brought to the city for the work. On one of the barges Bulkley was fined \$10. Another is the big shovel used in making the trench, and on the lower deck of the third are the office, dining room and kitchen, while the fourth is used as sleeping quarters for the twelve men who comprise the working force.

The main wall lies ten feet below the bottom of the channel, which is twelve feet deep at low water. A trench 25 feet wide has been dredged twice. Because the trench was necessary not only to make the trench of unusual width but also to dig it a second time. Even now the trench is not deep enough to lay the pipe from the west bank at a point directly behind the southeast corner of the railroad station and continues under water for 555 feet to the foot of the Nichols street.

It will connect with a line leading to the Beaver Dam reservoir in Stratford. Three hundred feet of pipe have already been laid in position. One length of pipe is 12 feet, and four lengths comprise a section. These four lengths are bolted together in the trench, and are placed in both ends of each section. The derrick then sinks the section into place, the diver guiding it with compasses. The work of bulkheading the trench from the west bank and sinking the pipes two pipes have been driven and saved off by a circular saw, operated from above.

But guided by the diver. The diver then places an 8x3 timber on the piles, on which one end of the section is to rest, and then hammers two chop blocks into place on either side of the pipe supports. The flange of the section already laid is united with the flange of the newly laid section. The diver then knocks the bulkhead from the projecting end of the new section, and the inner bulk, which has been tied with a rope before being lowered, is then pulled out by that means. The same operation of placing a timber on two piles is repeated at the other end of the section.

Only three sections are laid each week as the disadvantages under which the men work are many. The diver must do all his work in darkness and use his sense of feeling in everything he does, as the water at the point where the work is being done is always filled with sediment from the sewer which empties into the harbor in this neighborhood, and the dyes from the Salts Textile works and from the Road Carpet Co. give the water a varied colored hue.

The pipes are at a uniform depth of 22 feet from bank to bank, coming up on either shore perpendicularly. The main is a straight line from the point it enters the water from the west bank to the northern end of the wharf of the Bridgeport Motor Co., where it will "angle" so as to make the Nichols street connection. When completely laid an 8 inch layer of mud will cover the pipes.

Most of the men doing the work are Norwegians and familiar with such work from long experience. Louis Olsen is in charge of the bridge, and William Taylor is the derrick barge. Charles Berglund is the diver. Two men operate the air compressor which supplies air to the diver, and the work is constantly at a phone connection with the diver while he is below water. The diver works at a depth of about 20 feet, where there are 15 pounds pressure to the square inch due to the water about him, which tends to crush him. The normal atmospheric pressure of 15 pounds per square inch of the bridge is 15 pounds supplied to the diver, thus offering a leeway of 7 pounds for emergencies, such as the leaking of the valves, or the breaking of the hose. The deep hole in the harbor bed which would cause an increase of pressure as he dropped into the greater depth. Luckily the wreck occurred in shallow water and the crew was able to keep the lighter aloft. The woman and her little child were almost unconscious from fright.

The Gowanus, at her Staten Island dock, sighted the wreck of the Stevens with the Confidence standing by and pulled out to the wreck. One of the crew of the Stevens, a woman cook and her baby girl were in a huddled up state in the upper part of the Stevens when the Gowanus reached the wreck. Small boats were immediately put out and the men and woman and child taken on board the Gowanus. The wreck occurred in shallow water and the crew was able to keep the lighter aloft. The woman and her little child were almost unconscious from fright.

ONE MAN DROWNED

ELEVEN RESCUED

In Collision of Steam Lighter and Tug Off Staten Island Today.

MOTHER CLASPS HER BABY

(Special from United Press.)

New York, July 20.—One man, Assistant Steamer Engineer George Logan, was drowned, nine men and a woman and baby were rescued when the steam lighter Martha Stevens of the New York and Philadelphia Canal line sunk in collision with the tug Confidence off Robbins Reef, a mile from Staten Island, today.

The rescued were taken aboard the ferryboat Gowanus and carried to St. George, S. I.

The Gowanus, at her Staten Island dock, sighted the wreck of the Stevens with the Confidence standing by and pulled out to the wreck. One of the crew of the Stevens, a woman cook and her baby girl were in a huddled up state in the upper part of the Stevens when the Gowanus reached the wreck. Small boats were immediately put out and the men and woman and child taken on board the Gowanus. The wreck occurred in shallow water and the crew was able to keep the lighter aloft. The woman and her little child were almost unconscious from fright.
